

RAVE FORUM#2

November 04, 2025 from 13:00 to 14:30 CET

2.RAVE FORUM 2025 as public webinar: „Sea State measurements and simulations“

We would like to welcome you to our next **RAVE FORUM on Thursday, November 04, 2025**.

It is an invitation to all researchers working with RAVE data and addressing the growing international community interested in RAVE research.

Benefit as active participant from latest news about the offshore windfarm alpha ventus.

Gain interesting insights by networking with organizers and other attendees.

Join data users' discussions on the current state of simulations and the needs of the industry regarding sea states.

These are **topics in our second RAVE FORUM**:

- The measurements are organized by the BSH (Federal Maritime and Hydrographic Agency) in the North Sea and at alpha ventus OWF (Presentation by the BSH)
- Simulations based on these measurements are developed at Leibniz University Hannover (Presentation by Ludwig Franzius Institute of Hydraulic, Estuarine and Coastal Engineering)
- After the presentations we have time for questions and discussions on both – the data and the simulations

[Microsoft Virtual Events Powered by Teams](#)

It is a free and public MS Teams webinar.

Please make sure to register a few minutes before official start and accept the data privacy statement in advance.

That will allow you access and participation on time.

Best regards,

The RAVE Coordination at the Fraunhofer Institute for Wind Energy Systems IWES, Germany.

If you have questions, feedback or would like to receive more information on RAVE, please contact us at info-rave@iwes.fraunhofer.de
